

AS 100 Intraoral Scanner

Fast Scanning

High Accuracy

Cost Effective

“ The team here was taken back by the performance of this thing... full-arch scans easily within 35 seconds. ”

Dr Ahmad Al-Hassiny
Director of the Institute of Digital Dentistry

Allied Star AS 100

Shift gears to digital impression taking

The AS 100 intraoral scanner makes switching to digital dentistry incredibly easy, and surprisingly affordable. Speed up your workflow and give patients a much more comfortable experience with the new AS 100.

Fast Scanning

Take full arch impressions in as little as 35 Seconds.

Accurate Impressions

The AS 100 matches best-in-class accuracy, with just 20µm deviation on a full arch scan.

Competitive Price

Premium performance at an affordable price point.

Easy & Intuitive

1 USB cable and 3 buttons let you do everything you need simply and efficiently.

No yearly fees

The only on-goings are new tips, which last 60 autoclave cycles.

New Colour Mapping

All new colour and texture mapping driver means true-to-life colour, for accurate restoration margins.

Smart Reminders

Focus on your patient, not on your screen, thanks to audio prompts while scanning.

Margin Line Tools

Set your lab up for success with automatic or manually placed margin lines.

Simple Software

ScanPro software is simple and efficient to learn, and to use.
